## FOREWORD

It is our great pleasure to officially release the final results of the 2014 Cambodia Inter-censal Economic Survey (CIES2014) which was conducted from 1 to 31 March 2014 with 1 March 2014 as the reference date, covering the entire territory of the Kingdom of Cambodia. The CIES2014 is a sample survey and is an inter-censal survey which is to be conducted between two decennial censuses, that is, between the 2011 Economic Census and the 2021 Economic Census. The preliminary results were released in September 2014 prior to the final results.

Under the legal basis of the Statistics Law, the CIES2014 aims at compiling basic statistics on establishments and enterprises in the whole Cambodia's territory. The final results provide information on the current situation of establishments in Cambodia and serve for various users such as policy makers, government officials at both national and local levels, international organizations, NGOs, private sectors, researchers, and development partners.

The final results will contribute to achieving the socio-economic development goals of the Royal Government in supporting evidence-based planning. I am sure that the public will be very much benefitted to use the CIES2014 results to the full extent possible.

We express our deep sense of gratitude to the Royal Government of Cambodia led by **Samdech Akka Moha Sena Padei Techo HUN SEN**, Prime Minister of the Kingdom of Cambodia. His constant support to the CIES2014 brought successful completion of both enumeration and data processing. Our thanks are due to the Ministry of Planning (MOP), the National Institute of Statistics (NIS) and line ministries such as the Ministry of Economy and Finance, the Ministry of Industry, the Ministry of Commerce, the Ministry of Interior and other relevant government ministries and institutions which facilitated our activities and led to the success of the CIES2014.

I gratefully acknowledge technical and financial assistance provided by the Government of Japan and Japan International Cooperation Agency (JICA). Our deep thanks are due to Mr. Fumihiko Nishi, Chief Adviser of the JICA Project on Improving Official Statistics in Cambodia, Mr. Masahiko Sue, Ms. Yukako Toko, Mr. Akihiko Ito, Mr. Akihito Yamauchi, Mr. Joji Sawada, and other JICA experts of this project, who made all the best efforts in the complete success of the implementation of the CIES2014.

We thank Governors of Phnom Penh Municipality and Provinces, and Chiefs of Districts as well as Chiefs of Communes and Villages, who provided administrative facilitation for the implementation of the CIES2014.

The CIES2014 was a great statistical exercise, and its successful completion was possible with the total help and cooperation received from one and all. The major share of the credit for the success of the CIES2014 should go to the entrepreneurs of small, medium and large enterprises who paid busy and valuable time of their daily business to provide information to the CIES2014 Forms.

Deep thanks are also given to enumerators, supervisors, and the staff of the NIS and the MOP who were devoted, hard working, and loyal. H.E. Ms. Hang Lina, Director General of the NIS ably led the CIES2014 operations, being assisted by Mr. Khin Sovorlak, Deputy Director General, and other NIS staff.

Finally, thanks are due to the members of the CIES Technical Committee and others that contributed to the great success of the CIES2014.

Although the number of establishments with 1, 2 or 3 persons engaged is a majority group, the number of persons engaged in these establishments is 783,260 and it accounts for 41.8% of the number of persons engaged in Cambodia. The number of large establishments with 101 and over persons engaged is a minority group, however, the number of persons engaged in these establishments is 529,570 and it accounts for 28.2% of the number of persons engaged in Cambodia. A notable characteristic with persons engaged in large establishments is a large proportion of females to males. In other words, large establishments provide employment opportunities for females. (Refer to Table 11-1-1)

Compared with the results of EC2011 and EL2009, the number of persons engaged in establishments with 2, 3 and 101 and over persons engaged increased continuously. This contributes to the growth of persons engaged in Cambodia, and accounts for 78.1% of the total increase from 2009 to 2011 and 87.4% of that from 2011 to 2014 respectively.

#### **6. Number of persons engaged in “Wholesale and retail trade; repair of motor vehicles and motorcycles” increased outstandingly.**

Looking at the number of persons engaged by industrial classification, the largest industry is “Wholesale and retail trade; repair of motor vehicles and motorcycles” among the sections of ISIC. The number of persons engaged in this section is 631,141 and it accounts for 33.7% of the number of persons engaged in Cambodia. Subsequently, “Manufacturing” employs 577,739 accounting for 30.8%;

“Accommodation and food service activities” employs 183,053 accounting for 9.8%; “Education” employs 167,118 accounting for 8.9%; and so on. In terms of composition on sex of persons engaged, females outnumbered males in “Manufacturing”, and so on. (Refer to Table 12-1-1)

Compared with the past proportions of sections of ISIC to the total on number of persons engaged, “Wholesale and retail trade; repair of motor vehicles and motorcycles” increased outstandingly. As a result, the proportion on this industry exceeded that of “Manufacturing” which had been the largest industry in terms of persons engaged in EC2011. This was caused by the rapid growth of the number of persons engaged in “Wholesale and retail trade; repair of motor vehicles and motorcycles”. The number of persons engaged in this industry increased approximately 1.5 times from 2009 to 2014, while “Manufacturing” increased approximately 1.1 times in the same period.

Similarly, “Accommodation and food service activities” and “Education” increased gradually in the number of persons engaged and the proportion in terms of persons engaged. The number of persons engaged in “Accommodation and food service activities” increased approximately 1.6 times from 2009 to 2014, and “Education” approximately 1.4 times.

#### **7. Phnom Penh accounts for one third in terms of persons engaged.**

Subsequently, Kampong Cham marked 166,452 accounting for 8.9%; Siem Reap marked 152,053 accounting for 8.1%; Kandal marked 145,232 accounting for 7.7%; and so on. Persons engaged concentrate in Phnom Penh, and the above 4 provinces occupy 54.2% of the total number of persons engaged in Cambodia.

Examining the rates of contribution of provinces, Kampong Cham, Kampong Chhnang, Kampong Speu and Siem Reap increased its rate and they can explain 54.7% of the rate of increase in the number of persons engaged in Cambodia from 2011 to 2014. Since these 4 provinces have a large proportion and a high increasing rate regarding the number of persons engaged, its contribution to the increasing rate of the whole country is substantial.

#### **8. Annual sales of entities in Cambodia were about 23 billion US dollars.**

The total amount of annual sales of entities in Cambodia was USD 22.6 billion (about an 84% increase compared with that of EC2011).

Entities with 1,000 and over persons engaged gained the largest amount with USD 8.6 billion and accounting for 38.0% of the aggregated sales amount. Looking at the annual profit and loss per entity, 1,000 and over reported the largest amount of profit and loss of USD 4.5 million, 611 times larger than the average amount in Cambodia. The size of profit and loss increased in tandem with the increase of the size of entire persons engaged except for entities with 20-49 persons engaged. But if calculating Profit and Loss to Sales Ratio per entity for reference, the average ratio of the whole entities in Cambodia (both sexes) was 16.7% whereas that of entities with 1,000 and over was only 6.8%, lower than the average ratio. Entities with male representatives reported a nearly 2.5 times larger amount of profit than entities with female representatives. The difference of profit and loss amount between entities with male representatives and those with females by size of entire persons engaged is largest for 1,000 and over persons engaged (USD 5.5 million vs. 1.0 million). But if calculating Profit and Loss to Sales ratio of the whole entities by sex of representative for reference, the ratio of entities with male representatives was lower than that of female representatives (14.2% vs. 22.9%). (Refer to Table 27-2.)

**24. Entities with 10-19 persons engaged reported the largest profit and loss per entire**

### **person engaged**

Looking at the annual profit and loss per entire person engaged, the largest amount was reported by 10-19 persons engaged (USD 6.3 thousand, 2.9 times larger than the average amount in Cambodia), while 20-49 persons engaged reported the smallest average amount of profit and loss (USD 476 and only 22.1% of the average amount in Cambodia). Entities with 1,000 and over persons engaged recorded a smaller amount of profit and loss (USD 2,003) than the average amount (USD 2,151), because of the small amount of profit reported by entities with female representatives (USD 460). (Refer to Table 27-3.)

### **25. “Wholesale and retail trade; repair of motor vehicles and motorcycles” recorded the largest profit and loss amount**

By section of industrial classification (ISIC), “Whole sale and retail trade; repair of motor vehicles and motorcycles” recorded the largest amount of profit and loss of USD 2.1 billion. But looking at the profit and loss by sex of representatives, “Manufacturing” with male representatives recorded the largest amount of profit of USD 1.3 billion and 33.2% of the total amount whereas “Others” with male representatives in total reported a loss (USD -298 million, nearly 8% of the total amount of profit and loss). (Refer to Table 28-1-1 and Table 28-1-2.)

### **26. “Manufacturing” reported the largest amount of annual profit and loss per entity**

Looking at the amount of annual profit and loss per entity by section of industrial classification, “Manufacturing” reported the largest amount of USD 19.0 thousand, 2.6 times larger than the average amount of the whole entities in Cambodia.

By sex of representatives, “Manufacturing” with male representatives reported the largest amount of profit and loss of USD 33.5 thousand per entity, 4.5 times larger than the average amount. The loss of “Others” was USD -12.0 thousand and especially the loss of “Others” with male representative was USD -24.0 thousand, more than 3 times larger than the average profit amount of the whole entities in Cambodia. (Refer to Table 28-2-1 and Table 28-2-2.)

### **27. Entities with male representatives of “Wholesale and retail trade; repair of motor vehicles and motorcycles” reported the largest amount of profit and loss per entire person engaged**

Looking at the annual profit and loss per entire person engaged, entities in Cambodia reported USD 2,151 profit per person engaged. “Wholesale and retail trade; repair of motor vehicles and motorcycles” with male representatives reported the largest amount of USD 4,669 per person engaged, 2.2 times larger than the average amount of profit and loss per entire person engaged, while “Education” with male representatives reported the smallest amount of profit of USD 278. (Refer to Table 28-3-1 and Table 28-3-2.)
